Meditation & Land Conservation (made up organization)

Homepage Intro:

Meditation & Land Conservation seeks to inform others about methods of protecting our land that are both beneficial for the earth and our beings. We want to help people visualize a world that is thriving in greenery and protection for our wildlife. The animals that we all love to see in zoos and aquariums exist outside of these confined spaces and as people inhabiting their space, we have to show respect for their homes. This means keeping the water clean or recycling our trash so that they do not end up in their habitats.

The meditation in our name is also part of our mission. We want to promote a meditative lifestyle for people in order to work on self-improvement and a healthy mindset. Meditation is something completely different for everyone, to accommodate this, we want to showcase the various meditation techniques from all over the world. In combination with our goal for land conservation, we want to show how nature and meditation can be intertwined to create a healthier lifestyle. Follow our journey to see how we can clean the earth and our minds one day at a time. (Made up organization)

Using the power of science, exploration, education,
and storytelling to illuminate and protect
the wonder of our world

Product Idea:

A protection charm of sorts. Something similar to the charms they sell at Japanese shrines. Maybe a keychain of Totoro as a reminder to stay committed to cleanliness.

Conclusion:

What can you do to get the protection of the spirit of the forest? It's easy. By cleaning the environment, you are one step closer to ensuring your protection. You can recycle your trash, eat waste-free, clean up after yourself, do all of these minimal tasks and you are gaining the respect of the spirit of the forest. This is fair trade because by ensuring the cleanliness of the environment, the spirit of the forest will grant your protection in all the ways that count. Think of it as a trade of security, keeping the land protected from pollution will gain you the protection of the mind. It all starts here, find out how you can live sustainably.
